SMYTH

- Smyth SM14 (the smallest)
- Smyth DIGITAL LINE (the newest) integrated folding and thread sewing

"Thread-BINDING" made easy!

SideSewer ODM SuperSewer™ (CE)

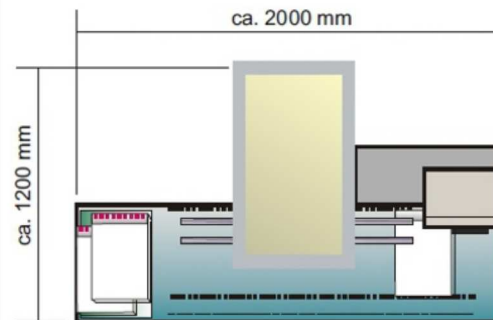

Automatic thread sewing of short runs, with one-minute make-ready to other formats. SuperSewer™ was specially developed to side sew blocks of On Demand photo books, children and text books up to 12 mm thickness using strong Nylon and cotton thread. A Touch Screen control panel makes it easy to operate. Super Sewer™ features Back Tack Technology™. Simply put, the sewing machine does a reverse back stitch on the head and foot of the book block. This very strong sewing will not come apart at the ends (like standard sewn blocks often do), but ensures a durable book lasting for generations.

Special Quality Features

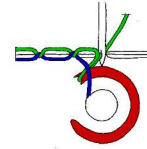

- Self-adjusting machine offers quick size change
- Easy to operate LCD Touch Screen and quick change bobbin
- Safety guard (acrylic glass) swings open for easy access
- Durable thread sewing thanks to Back Tack Technology™
